Insulated Line Post

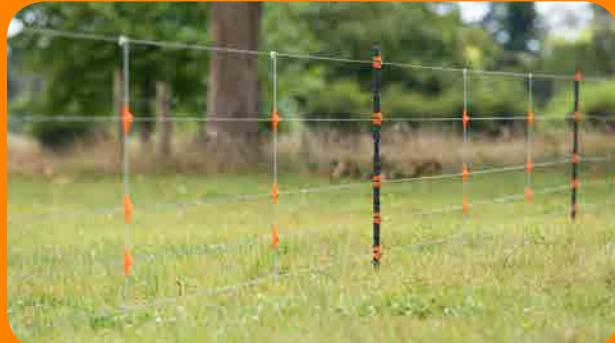

The Tailor-made Electric Fence Post.

Simple, low cost installation – no machinery required

Multiple wire heights – pre-formed wire attachment locations with snap-on clips

Strong, yet flexible – solid 16mm fibreglass core enables flex on impact

Perfectly insulated – UV stabilised polyethylene outer

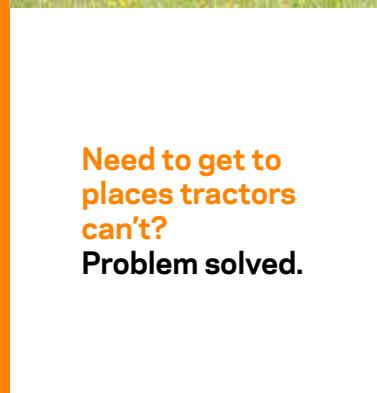

Want a permanent electric fence you can install yourself?
Problem solved.

Want cost effective waterway protection?
Problem solved.

Want safety with style?
Problem solved.

Need to get to places tractors can't?
Problem solved.

Insulated Line Post

The Tailor-made Electric Fencing Post

UV resistant

Warranty

EASY TO TRANSPORT - Light, smooth and compact. Can be transported inside the farmer's vehicle which further reduces costs.

LONG LIFE - High quality materials ensure a long life. A UV protected polyethylene sheath protects fibreglass from UV damage.

FAST AND SIMPLE INSTALL - The composite post can be easily installed with a hand rammer which reduces installation time and avoids the need for heavy expensive equipment. Wires simply clip onto the post, making it significantly faster than stapling or pinning on traditional post insulator systems.

MULTIPLE CONFIGURABLE WIRE HEIGHTS - Pre-formed wire attachment locations enable many different fence configurations.

FLEXIBLE POSTS - The strong yet flexible solid fibreglass core enables the post to flex when the fence is impacted, preventing broken or bent posts, and minimising animal injury.

STRONG GROUND ANCHORING - The multi-flanged foot design ensures strong ground anchoring, reducing the likelihood of post heave or post misalignment over time.

Product Specifications

POST HEIGHT EXCL. FOOT (HEIGHT INC. FOOT)	950mm (1370mm)	1140mm (1600mm)
PRODUCT NUMBER:	G74203	G74213
PACKAGE QUANTITY:	10	10
ANIMALS CONTROLLED:		

POST HEIGHT EXCL. FOOT (HEIGHT INC. FOOT)	1350mm (1900mm)	1500mm (2050mm)
PRODUCT NUMBER:	G74223	G74233
PACKAGE QUANTITY:	10	10
ANIMALS CONTROLLED:		

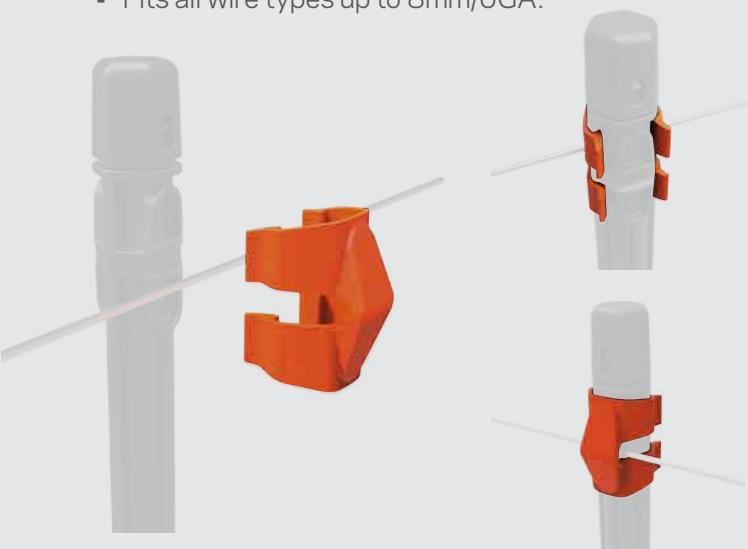

Insulators

Insulated Line Post Clips

*Sold separately

- Fast install, easy to use, no tools required.
- Glass-filled nylon "snap-on" clips form a reliable connection to the post
- Up to 160KG of holding force. Typically twice as strong as most conventional wood or steel post insulator attachment systems
- Fits all wire types up to 8mm/OGA.

Insulated Line Post Clip

PRODUCT NUMBER:	G74434
PACKAGE QUANTITY:	20

Fits all Gallagher Insulated Line Posts

Insulated Line Post 40mm Tape Clip

*Sold separately

- Fast install, easy to use, no tools required.
- Glass-filled nylon "snap-on" clips form a reliable connection to the post.
- Up to 160KG of holding force.
- Typically twice as strong as most conventional wood or steel post insulator attachment systems.
- Soft rubber jaw locks tape in place and prevents wear.
- Fits all tape conductors up to 40mm wide.

Insulated Line Post 40mm Tape Clip

PRODUCT NUMBER:	G74703
PACKAGE QUANTITY:	20

Fits all Gallagher Insulated Line Posts

Electric Fence Dropper

Fence further for less

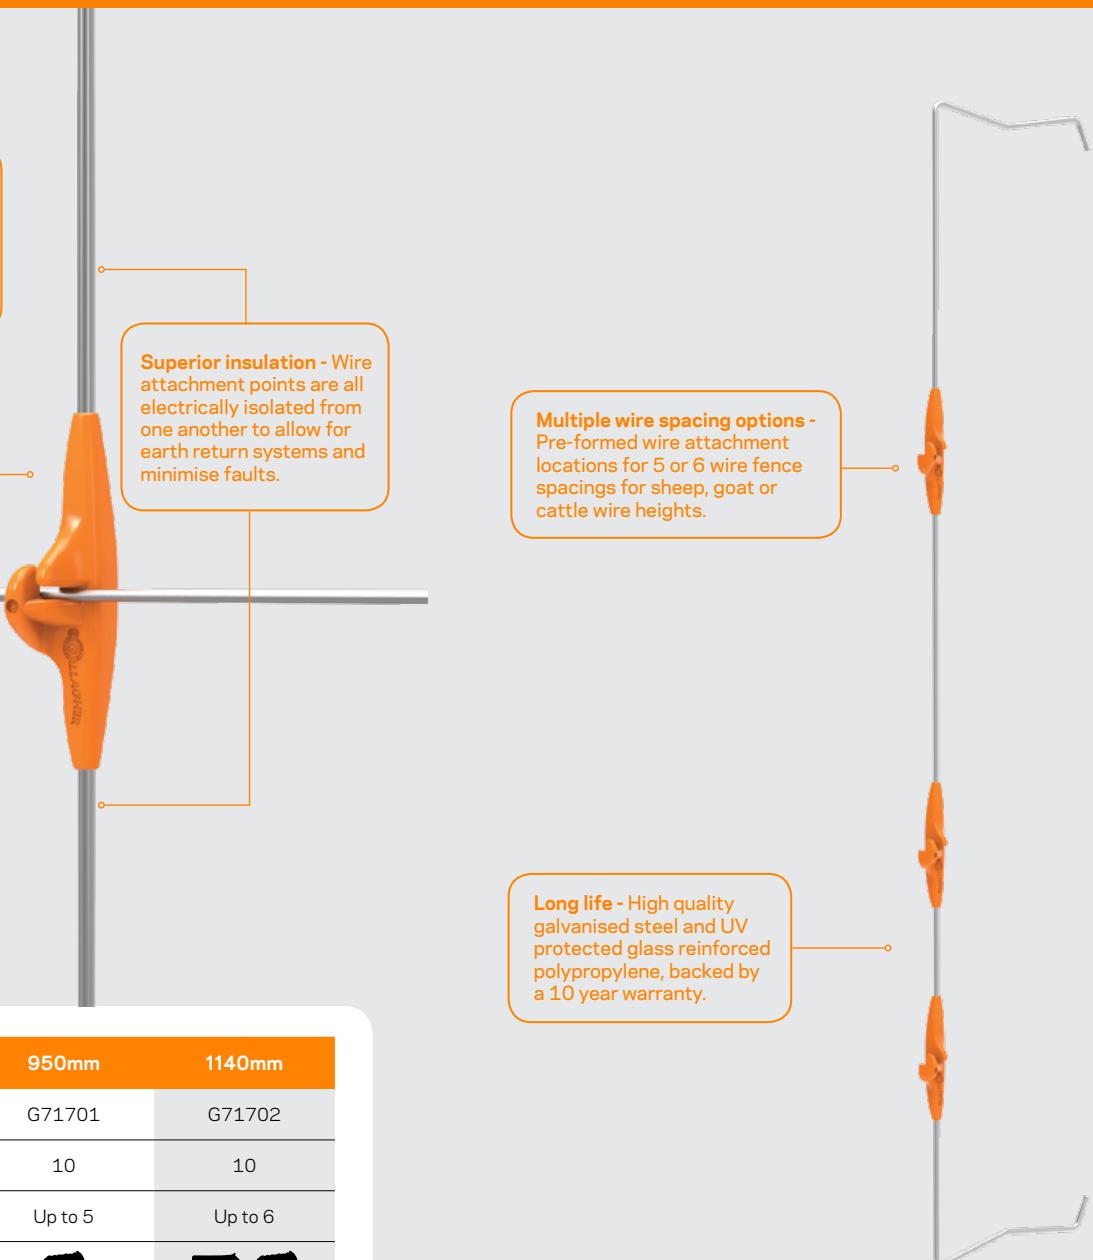

High strength, secure wire attachment - Glass-filled polypropylene insulation secures wires in correct position for reliable wire attachment.

Superior insulation - Wire attachment points are all electrically isolated from one another to allow for earth return systems and minimise faults.

Multiple wire spacing options - Pre-formed wire attachment locations for 5 or 6 wire fence spacings for sheep, goat or cattle wire heights.

Long life - High quality galvanised steel and UV protected glass reinforced polypropylene, backed by a 10 year warranty.

DROPPER LENGTH	950mm	1140mm
PRODUCT CODE:	G71701	G71702
PACKAGE QUANTITY:	10	10
FENCE WIRES:	Up to 5	Up to 6
ANIMALS CONTROLLED:		

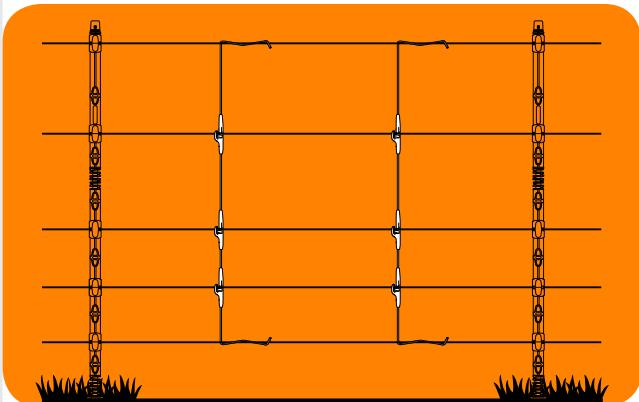

Electric Fence Dropper

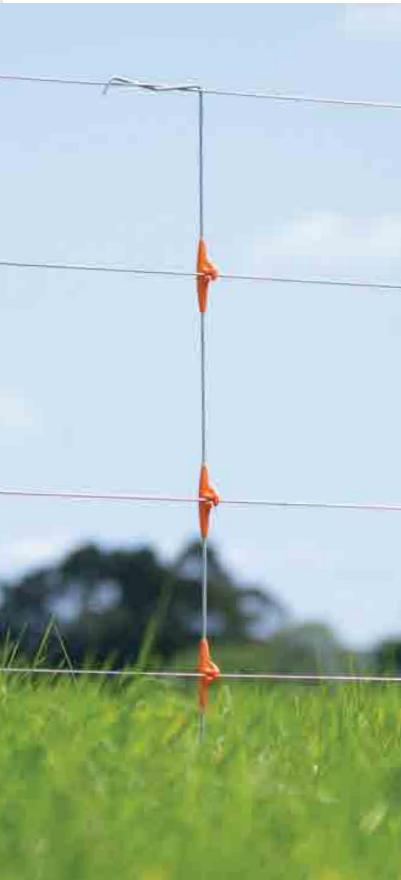

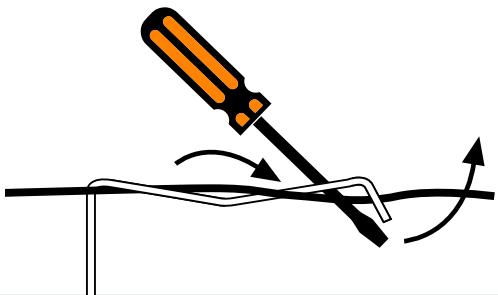

Fence further for less

Lowers fence cost by extending post spacing. Suitable for multi-wire sheep, goat and cattle electric fence applications supported by wood, steel and Gallagher Insulated Line Posts.

Lower fencing costs - Electric fence droppers maintain wire spacing, reducing the number of posts required in a fence line.

Easy to install - No machinery required, simply installed on the fence line using a screwdriver.

Fast install, easy to use, no machinery required

- 1** Put sleeve over the post to prevent the post flexing while it is being rammed in to the ground.

- 3** Ram the post in to the ground until the flange on top of the foot is level with the ground.

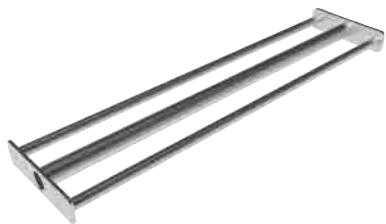

- 2** Line up the post to the guide wires.
Ensure the wider wings on the foot are running parallel to the fence wire.

- 4** Snap the fence wires to the post using the Insulated Line Post Clip.

Tools

Installation accessories

Line Post Rammer G52501

Designed specifically to drive/ram the Insulated Line Post into the ground

Foot Plate G54301

Prevents the Insulated Line Post sinking on hills due to fence tension on abrupt rises

Line Post Sleeve

950mm sleeve - G53001
Prevents flex when driving the 950mm or 1350mm insulated line post when using a standard T or Y post rammer

1350mm sleeve - G53003
Prevents flex when driving the 1350mm or 1500mm Insulated line posts - required when driving into hard ground

Line Post Lifter Attachment G52701

Attaches to most Steel Post Pullers/Lifters to safely pull out the insulated line post or pilot from the ground

Pilot G54001

Designed to provide a pilot hole for the Insulated Line Post in harder rockier ground

Screw-in Tie Down and Handle

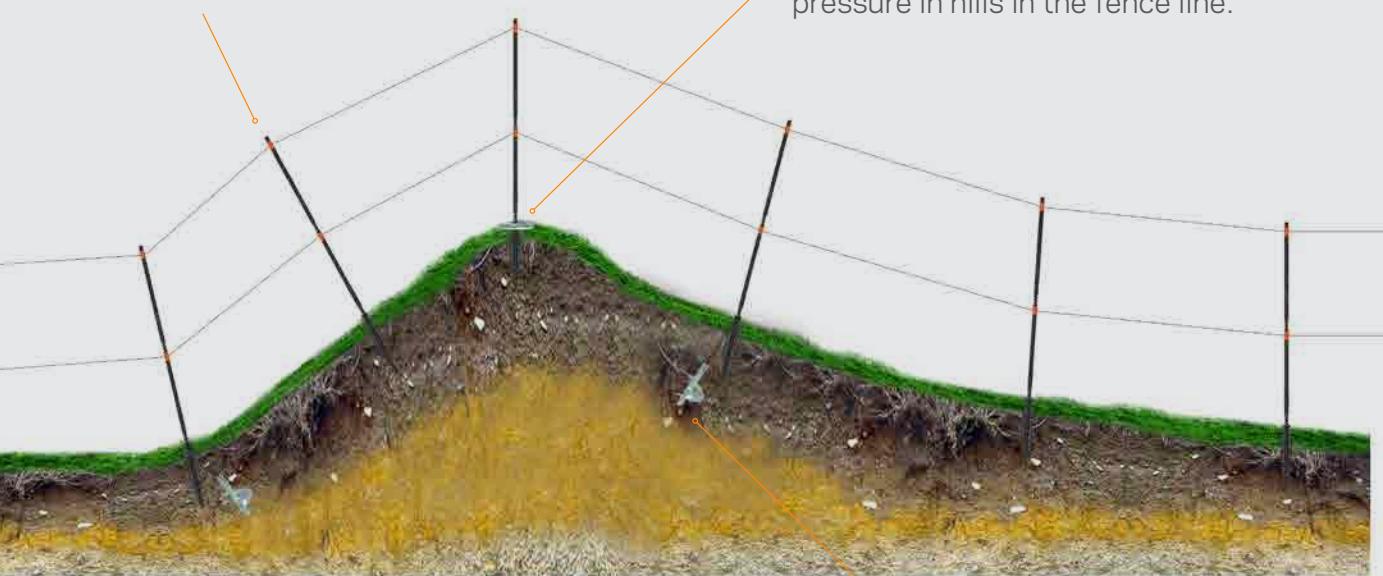

Screw-in Tie Down - G61500 Handle - G61501
Anchors post to the ground in surface dips and hollows.
Requires Screw In Handle (G61501) to install

Fence installation example

When fencing over hills and hollows in the landscape, use Gallagher Insulated Line Post system tools to ensure a reliable, long lasting fence line.

Ensure posts are perpendicular to the ground and fence wire to keep the spacing between wires consistent.

Foot Plate ensuring the fence post does not sink due to the wire pressure in hills in the fence line.

Screw in anchors holding the post down in hollows in the fence line.
